

A MESSAGE FROM THE  
LANGLEY CITY  
**CRIME  
PREVENTION  
COMMITTEE**

## Importance of Reporting

Did you know the Langley RCMP use crime statistics to map out reported crime for both residential and business properties in our community? Once mapped out, the RCMP can focus their resources on the problem areas to help reduce crime.

The crime statistic map is created by tracking both emergency and non-emergency calls to the RCMP. To have resources directed to your area, businesses need to report all crimes perpetrated against their property. This process alerts the RCMP to where the crime hot spots are and then they can respond by increasing patrols in those areas.

Knowing your neighbouring business owners and staff makes for a stronger, connected business community. Exchange cell phone numbers and share information about incidents and look out for each other.

Most importantly, report all crime or suspicious activity! For emergencies, dial 911. For non-emergencies call 604-532-3200 or report online at <https://ocre-sielc.rcmp-grc.gc.ca/langley/en>
